15	115	Check header background	verify header background loads properly	internet browser & website working	1.open website	facebook.com	header background should load without distortion	As per expected result	pass

16	116	Check language selector visibility	verify language selector is visible	internet browser & website working	1.open website	facebook.com	language selector options must be clearly visible	As per expected result	pass
17	117	Check Header links	verify all headers links are visible&clickable	internet browser & website working	1.open website2. check all header links	facebook.com	all header links must be visible and clickable	As per expected result	pass
18	118	Check responsiveness of header	verify header adjust properly on mobile/tablet/desk top	internet browser & website working	1.open website2. resize window or check in mobile	facebook.com	header should adjust without breaking layout	As per expected result	pass
19	119	Check header alignment	verify header elements are properly alignened	internet browser & website working	1.open website	facebook.com	all header items mustbe perfectly aligned	As per expected result	pass
20	120	Check header hover effects	verify hover effect on header elements	internet browser & website working	1.open website	facebook.com	all header items mustbe perfectly aligned	As per expected result	pass
21	121	Check Accessibility lables	verify that all accessibility lables in header are readable&visible	internet browser & website working	1.open website2. launch website3. inspect header lables	facebook.com	accessibility lables must be clearly visible & readable	As per expected result	pass
22	122	Check header navigation	verify header navigation links work properly	internet browser & website working	1.open website2. navigation to website3.click each header link	facebook.com	navigation links should redirect to correct pages	As per expected result	pass
23	123	Check header loading time	verify header loads completly within acceptables time	internet browser & website working	1.open website2. enter url3.observe header load time	facebook.com	header should load within 2-3 seconds	As per expected result	pass
		Login page						
24	124	Check input field labels	verify username/email& password lables displayed properly	internet browser & website working	1.open browser2. enterURL	facebook.com	Both labels must be visible	As per expected result	pass
25	125	Check username/email field visibility	verify username/email field is visible	internet browser & website working	1.open loginpage	facebook.com	username/email field should be visible	As per expected result	pass
26	126	Check password field visibility	verify password input box is visible	internet browser & website working	1.open loginpage	facebook.com	password field must be visible	As per expected result	pass
27	127	Check username/email field accepts valid input	verify field accepts valid email/phone	internet browser & website working	1.enter valid email/phone	test@gmail. com/9825391320	field must accept valid data	As per expected result	pass
28	128	Check password field accepts chracters	verify password input accepts characters	internet browser & website working	1.enter password	ABC@123	should accept characters	As per expected result	pass
29	129	Check password field masking	verify password field masked	internet browser & website working	1.enter password	ABC@124	password must appear as......	As per expected result	pass

30	130	Check input field placeholder text	verify placeholder text is shown	internet browser & website working	1.open login page	ABC@125	placeholder text should be visible	As per expected result	pass
31	131	Check input field border highlight	verify border highlights on click	internet browser & website working	1.click on input field	ABC@126	border must highlight	As per expected result	pass
32	132	check input field error message	verify proper error message appears	internet browser & website working	1.leave field empty2. click login	ABC@127	proper error message must appear	As per expected result	pass
33	133	Check input field empty validation	verify field cannot be empty	internet browser & website working	1.click login without input	ABC@128	validation message must show	As per expected result	pass
34	134	Check pasting allowed	verify paste works in input fields	internet browser & website working	1.copy text2.paste in field	test@gmail.com	paste should work	As per expected result	pass
35	135	Check auto-fill suggestion	verify browser auto-fill works	internet browser & website working	1.click username field	test@gmail.com	browser suggestion must show	As per expected result	pass
36	136	Check max characters limit	verify input limit works	internet browser & website working	1.enter 200+ characters	long string	field should not allow excess characters	As per expected result	pass
37	137	Check special chracters handling	verify fields handles special characters	internet browser & website working	1.enter special chars	@@#$%&^	must not accept invalid special characters	As per expected result	pass
38	138	Check field alignment	verify input fields alignment	internet browser & website working	1.open login page	@@#$%&^	all fields must be properly aligned	As per expected result	pass
39	139	Check username/email field with invalid input	verify invalid data is rejected	internet browser & website working	1.enter invalid input	@@@,1234	field should show error	As per expected result	pass
40	140	Check username/email field with only special characters	verify only special chars are rejected	internet browser & website working	1.enter only special chars	###@@@	error message must appear	As per expected result	pass
41	141	Check username/email field with no domain	verify field behaviour when domain part is missing	internet browser & website working	1.open login page 2. enter input without domain	testuser@	error message shown/input rejected	As per expected result	pass
42	142	Check username/email field with spaces	verify field does not accept spaces	internet browser & website working	1.open login page2. enter email with spaces	testuser@gmail. com	validation error shown	As per expected result	pass
43	143	Check username/email field with long invalid input	verify long invalid values are rejected	internet browser & website working	1.open login page2. enter long invalid string	aaaaaaaaaaaa... (100 chars)	validation error shown	As per expected result	pass
44	144	Check username/email field empty validation	verify empty fields shows required error	internet browser & website working	1.open login page2. leave email empty 3. click login	aaaaaaaaaaaa... (100 chars)	field required message shown	As per expected result	pass
45	145	Check forget password link visibility	verify visibility of forget password link	internet browser & website working	1.open login page	aaaaaaaaaaaa... (100 chars)	link should be visible	As per expected result	pass

46	146	Check forget password link clickable	verify link is clickable and responsive	internet browser & website working	1.open login page2. click forget password link	aaaaaaaaaaaa... (100 chars)	redirect to recovery page	As per expected result	pass
47	147	Check navigation to password recovery page	verify clicking link opens recovery page	internet browser & website working	1.open login page2. click forget password link	aaaaaaaaaaaa... (100 chars)	required inputs fields visible	As per expected result	pass
48	148	Check email/username/phone visibility on reset page	verify fields appear on reset page	internet browser & website working	1.open reset page	aaaaaaaaaaaa... (100 chars)	ui loads correctly	As per expected result	pass
49	149	Check reset page UI	verify system accepts valid inputs	internet browser & website working	1.open reset page2. enter valid input	aaaaaaaaaaaa... (100 chars)	ui loads correctly	As per expected result	pass
50	150	Check valid username/email/phone input	verify system accepts valid inputs	internet browser & website working	1.open resetpage2. enter valid input	valid/email/phone	accepted & proceeds	As per expected result	pass
51	151	Check invalid username/email/phone input	verify system rejects invalid inputs	internet browser & website working	1.open resetpage2. enter invalid input	invalid/email/phone	validation error shown	As per expected result	pass
52	152	Check empty input field	verify empty fields shows error	internet browser & website working	1.open reset page2. leave field empty	invalid/email/phone	field required error	As per expected result	pass
53	153	Check submit button visibility	verify submit button is visible	internet browser & website working	1.open reset page	invalid/email/phone	submit button appears	As per expected result	pass
54	154	Check submit button enabled/disabled	verify enablinding/disabling based on input	internet browser & website working	1.open reset page2. enter valid/invalid data	valid+invalid data	button enabled only for valid input	As per expected result	pass
55	155	Check correct success message	verify correct success message appears after reset	internet browser & website working	1.open reset page2. submit valid input	valid email/mobile	success message displayed	As per expected result	pass
56	156	Check email/mobile receive reset link	verify reset link received	internet browser & website working	1.submit valid/email mobile	valid email/mobile	user receives reset link	As per expected result	pass
57	157	Check incorrect details message	verify error message for incorrect inputs	internet browser & website working	1.enter wrong email/mobile	invalid email/mobile	error message displayed	As per expected result	pass
58	158	Check back navigation	verify back button works properly	reset page open	1.click back button	invalid email/mobile	page navigation back	As per expected result	pass
59	159	Check reset page responsiveness	verify page ui adjustable on all devices	browser working	1.open page on multiple scrrens	invalid email/mobile	page responsiveness	As per expected result	pass
60	160	Check create new account button visibility	verify sign-up button visible	reset page open	1.check button visibility	invalid email/mobile	buttton visible	As per expected result	pass
61	161	Check create new account button redirect	verify page redirects to signup	reset page open	1.click new account button	invalid email/mobile	redirects to signup page	As per expected result	pass
62	162	Check first name field visibility	verify first name field visible	signup page open	1.open signup page	invalid email/mobile	field visible	As per expected result	pass
63	163	Check last name field	verify lastname field visible	signup page open	1.open signup page	invalid email/mobile	field visible	As per expected result	pass

64	164	Check mobile number/email field	verify mobile/email input visible	signup page open	1.check field	invalid email/mobile	field visible	As per expected result	pass
65	165	invalid email/mobile validation	verify error message for invalid inputs	signup page open	1.Enter invalid inputs	wrong email/mobile	validation message shown	As per expected result	pass
66	166	Check password field	verify password field visible	signup page open	1.check password fields	wrong email/mobile	field visible	As per expected result	pass
67	167	password field masking	verify password dots displays	signup page open	1.enter password	password	characters masked	As per expected result	pass
68	168	Dob field visibility	verify DOB field visible	signup page open	1.check invalid DOB	-	Field visible	As per expected result	pass
69	169	invalid age validation	verify error for invalid age	signup page open	1.enter invalid DOB	Age<13	error shown	As per expected result	pass
70	170	gender selection	verify gender radio button works	signup page open	1.select gender	-	Gender selected	As per expected result	pass
71	171	custom gender additional field	verify custome gender shows extra fields	Custome gender selected	1.select custome	-	Additional field visible	As per expected result	pass
72	172	submit button visibility	verify submit button visible	Signup page open	1.check submit button	-	Submit button visible	As per expected result	pass
73	173	sign up with empty fields	verify error for empty fields	Signup page open	1.click submit with empty fields	-	error shown	As per expected result	pass
74	174	signup with partially filled fields	verify error for partial fields	Signup page open	1.enter partial data	partial data	error displayed	As per expected result	pass
75	175	sign up with invalid inputs	verify validations for invalid data	Signup page open	1.enter invalid inputs	wrong inputs	validation message	As per expected result	pass
76	176	successfully sign up	verify complete signup works	Signup page open	1.enter valid data2. submit	valid user data	account created successfully	As per expected result	pass
77	177	close/cancle button visibility	verify close/cancle button is visible	page loaded properly	1.open page	-	close/cancle button should be visible	As per expected result	pass
78	178	check UI alignment	verify UI elements are aligneed correctly	page loaded	1.open page2.Check alignment	-	All UI elements must be properly aligned	As per expected result	pass
79	179	Check page responsiveness	verify page adjusts on all screen sizes	browser & internet working	1.Resize scrren2. open page	-	page should be responsive	As per expected result	pass
80	180	Check input field labels	verify lables are visible	page loaded	1.open page2.check lables	-	lables should be displayed correctly	As per expected result	pass
81	181	Check username/email field visibility	verify username/email field is visible	page loaded	1.open page	-	username/email field should be visible	As per expected result	pass
82	182	Check password field visibility	verify password field is visible	page loaded	1.open page	-	password field should be visible	As per expected result	pass
83	183	Check username/email field accepts valid input	verify valid inputs are accepted	page loaded	1.enter valid username/email/sub mit	valid username/email	field should accept valid input	As per expected result	pass

84	184	Check password field accepts chracters	verify password field accepts characters	page loaded	1.enter characters2. submit	valid password	password field should accept characters	As per expected result	pass
85	185	Check password field masking	verify password masking(...)	page loaded	1.enter password	password text	characters should be hidden/masked	As per expected result	pass
86	186	Check input field placeholder text	verify placeholder text	page loaded	1.check input placeholders	-	placeholder text should be visible	As per expected result	pass
87	187	Check input field border highlight	verify input border highlight on focus	page loaded	1.check input field	-	border should highlight on focus	As per expected result	pass
88	188	check input field error message	verify error message on invalid input	page loaded	1.enter wrong input2.submit	invalid data	proper error message should appear	As per expected result	pass
89	189	Check input field empty validation	verify validations when input is empty	page loaded	1.leave empty2. submit	-	error should show for empty field	As per expected result	pass
90	190	Check pasting allowed	verify input field allows passing text	Browser&website working	1.open page2.paste text in input field	valid data	text should paste successfully	As per expected result	pass
91	191	Check auto-fill suggestion	verify browser auto-fill options appear	browser auto-fill enabled	1.open page2.tap input field	saved autofill data	auto-fill suggestions appear	As per expected result	pass
92	192	Check max characters limit	verify field restricts input over max limit	Browser&website working	1.enter long text in field	long string	field should stop input after max limit	As per expected result	pass
93	193	Check special chracters handling	verify field accepts /blocks specail characters	Browser&website working	1.enter special characters	!@#$%^&*	system should validate characters properly	As per expected result	pass
94	194	Check field alignment	verify input field alignment	Browser&website working	1.load page	-	field should be properly aligned	As per expected result	pass
95	195	Check username/email field with invalid input	verify field rejects invalid entries	Browser&website working	1.enter invalid username/email	invalid @,text@	error message should appear	As per expected result	pass
96	196	Check username/email field with only special characters	verify special characters not allowed	Browser&website working	1.enter only special chars	@@@@####	error message should appear	As per expected result	pass
97	197	Check username/email field with no domain	verify missing domain validation	Browser&website working	1.enter email without domain	abc@	should shown domain missing error	As per expected result	pass
98	198	Check username/email field with spaces	verify spaces not allowed	Browser&website working	1.enter email with spaces	abc@gmail.com	validation error appears	As per expected result	pass
99	199	Check username/email field with long invalid input	verify long invalid string handling	Browser&website working	1.enter long invalid email	verlonginaligggvh j	error message appears	As per expected result	pass
100	200	Check username/email field empty validation	verify empty field shows error	Browser&website working	1.keep field empty2. click submit	-	field required message should appear	As per expected result	pass
101	201	Check forget password link visibility	verify link is visible to user	Browser&website working	1.load login page	-	forget password link should be visible	As per expected result	pass
102	202	Check forget password link clickable	verify link redirects correctly	Browser&website working	1.click forget password link	-	user should navigat to reset page	As per expected result	pass
103	203	Check navigation to password recovery page	verify navigation when user clicks forget password	Browser&website working	1.open login page2. click forget password	facebook.com	user should navigation to password recover page	As per expected result	pass

104	204	Check email/username/phone visibility on reset page	verify input fields are visible on reset page	reset page openened	1.opn reset page	-	all input fields must be visible	As per expected result	pass
105	205	Check reset page UI	verify UI elements of reset page	reset page openened	1.opn reset page	-	all input fields must be visibe	As per expected result	pass
106	206	Check valid username/email/phone input	verify valid input is accepted	reset page openened	1.enter valid input2. click submit	valid email/phone	system should accept the input	As per expected result	pass
107	207	Check invalid username/email/phone input	verify invalid input error message	reset page openened	1.enter invalid input2.click submit	wrong email/phone	error message should display	As per expected result	pass
108	208	Check empty input field	verify empty input throws validation message	reset page openened	1.leave input empty2.click submit	-	field required message should display	As per expected result	pass
109	209	Check submit button visibility	verify submit button is visible	reset page openened	1.open reset page	-	submit button shoulld be visible	As per expected result	pass
110	210	Check submit button enabled/disabled	verify submit button behaviour	reset page openened	1.load page2.try empty&valid inputs	-	should be disabled for empty&enabled for valid	As per expected result	pass
111	211	Check correct success message	verify success message after valid inputs	valid inputs entered	1.submit valid details	-	success message should display	As per expected result	pass
112	212	Check email/mobile receive reset link	verify reset link is received	valid inputs entered	1.submit valid email/phone	valid email	reset link should be received	As per expected result	pass
113	213	Check incorrect details message	verify message for wrong details	reset page openened	1.enter incooorect input	invalid email/	incoorect details message should show	As per expected result	pass
114	214	Check back navigation	verify user can navigate back	reset page openened	1.click back arrow/button	-	should navigate to previous page	As per expected result	pass
115	215	Check reset page responsiveness	reset page should adjust to scrren sizes	browser working	1.open reset page in diffferent scrren sizes	-	reset page should adjust to scrren sizes	As per expected result	pass
116	216	Check create new account button visibility	verify create new account button is visible on login page	browser&website working	1.open facebook login page	facebook.com	button must be visible	As per expected result	pass
117	217	Check create new account button redirect	verify clicking button redirects to sign-up page	browser&website working	1.open login page2. click create new account	facebook.com	user should be redirected to signup page	As per expected result	pass
118	218	Check first name field visibility	verify first name field visibility	signup page open	1.navigation to signup page	-	first name input field should be visible	As per expected result	pass
119	219	Check last name field	verify last name input field is visible	signup page open	1.open signup page	-	last name field should be visible	As per expected result	pass
120	220	Check mobile number/email field	verify mobile/email field visibility	signup page open	1.open signup page	-	mobile/email field should appear	As per expected result	pass
121	221	invalid email/mobile validation	check error message for invalid inputs	signup page open	1.enter invalid email/mobile2.click next	abc@,999	proper error message should appear	As per expected result	pass
122	222	Check password field	verify password input field is visible	signup page open	1.open signup form	-	password field should display	As per expected result	pass

123	223	password field masking	verify typed password is masked	signup page>password field visible	1.enter password	mypass123	password must show	As per expected result	pass
124	224	Dob field visibility	verify date of birth input is visible	signup page open	1.enter DOB<minimum age	DOB:2024	age restriction error should display	As per expected result	pass
125	225	invalid age validation	verify error message for under-age users	signup page open	1.open signup page	-	male/female/custom must display	As per expected result	pass
